## Clinical Trials Tracking Guide

WBDE Release 1.1.4

Released 03/08/2017

Updated 10/08/2018

Certain clinical trials will now be tracked in the PHTS web based data entry system (wbde) to be able to follow the patients involved long term after the trial has ended. At this time, only the TEAMMATE trial is being tracked in the PHTS wbde system. This document will be updated for each trial being tracked in PHTS.

### Show trials/registries

When a clinical trial is added to the PHTS system, only those sites participating will be able to see the clinical trial feature. A link will appear for participating sites under the patient header.

	<b>SML</b> ID: 12532 Date of Birth: 05/15/2000 Gender: Female	Listing Date:
<a href="#">Show trials/registries</a>		
<b>Patient Summary</b>		

Once the user clicks “[Show trials/registries](#)”, a drop down will display.

	<b>SML</b> ID: 12532 Date of Birth: 05/15/2000 Gender: Female	Listing Date:
Active trials/registries <b>TEAMMATE Trial</b> Beginning 11/16/2017 (No end date)    Enrollment Date: <input type="text"/> TEAMMATE Trial ID Number: <input type="text"/> Notes: <input type="text"/> (No data has been saved in this record yet) <input type="button" value="Save"/>		
<a href="#">Hide trials/registries</a>		
<b>Patient Summary</b>		

From here, the user can see all trials their center is participating in and there will be up to three fields available for data entry depending on the trial:

- Enrollment Date
- Trial ID Number
- Notes

### Saving Information

Once the user enters the necessary information, they can save the information by clicking ‘save’. This is very important as the information does not automatically save once entered.
